MUSHFIQUR RAHAMAN MUBIN

Mobile Application Developer — Flutter & Native Android/iOS

+8801732040803 | mushfiqr.work@gmail.com | linkedin.com/in/mashprime1 | github.com/mashlife | mushfiqr.is-a.dev

PROFESSIONAL SUMMARY

Mobile application developer with 5+ years across freelancing and full-time roles, 15+ apps published to Google Play and the Apple App Store. Started in native Android (Java), then moved to Flutter for cross-platform delivery, writing native Kotlin/Swift through platform channels only when a feature genuinely needs it. One app holds 8,000+ Play Store reviews at a 4.9 rating. Recently completed a Senior Flutter Developer role at Betopia Group; now taking select freelance projects while open to full-time work.

TECHNICAL SKILLS

Core Mobile: Flutter · Dart · Native Android (Java, Kotlin) · Native iOS (Swift) · Platform Channels

Architecture: Clean Architecture · State Management (Provider, GetX) · GoRouter

Backend & APIs: REST API Design & Integration · Node.js · TypeScript · Firebase · MongoDB

Systems & Advanced: VPN App Development (WireGuard, IKEv2, OpenVPN client integration) · AI Integration (Chat, Voice & Video) · Augmented Reality (AR) · AccessibilityService (key/gesture injection) · UDP Device Control · PassKit / Wallet Pass Generation

Publishing: Google Play & Apple App Store — app signing, release management, store listing optimisation

Tools: Git · Firebase Services · AWS (basic) · React

PROFESSIONAL EXPERIENCE

Senior Flutter Developer · Betopia Group (Full-time)

July 2024 – June 2026 · Dhaka, Bangladesh · Asia's largest AI & tech conglomerate, 5,000+ staff

- Embedded in a newly formed, 60+-person AI product department (Flutter · React · Node/Express · FastAPI · Zapier/n8n), shipping AI-powered apps and websites across food delivery, personal-assistant, travel booking, image/video generation, vehicle guides, and operations management (specific product names withheld under NDA).
- Built cross-platform Flutter apps with native Kotlin/Swift integrations via platform channels, used only when a feature genuinely needed native behaviour.
- Acted as the team's technical escalation point — resolved bugs and blockers other developers couldn't close, and coordinated daily with web, backend, and AI engineers to keep releases moving.
- Set the department's folder/file-structure conventions and mentored junior/mid-level developers on project structure, merge-conflict resolution, and responsible AI-assisted debugging (prompting, log analysis, verifying output before merge).
- Ran feasibility R&D on incoming projects and worked directly with clients to turn vague briefs into concrete specs.
- Built Zapier/n8n automation workflows (e.g., CRM/donor-pipeline integrations) supporting client operations.

Freelance Mobile Developer · Self-employed

2020 – 2024 · Remote · Local & international clients

- Built and published 15+ mobile apps across Google Play and the App Store — spanning VPN tools, ISP systems, AI companions, productivity apps, and e-commerce — owning every stage solo: scoping, architecture, UI, backend integration, store submission, and post-launch support.
- Built a track record of clean, maintainable delivery, leading to repeat clients and referrals.

SELECTED CLIENT PROJECTS

Life Good — Digital Business Platform · Play Store, Production

Full-stack build: Node.js + TypeScript backend with Flutter frontend. Micro-jobs, reselling, and referral platform — 8,000+ Play Store reviews at 4.9 rating.

BBB Express — Logistics & Shipment Management Platform · Client Project

Flutter admin app (35+ screens) plus companion web admin platform for a logistics/shipment operator — role-based dashboards, shipment creation, client/account workflows, and a package/barcode scanning module.

S-Finder — Mobile Schematic App · Play Store

Phone repair tool giving technicians circuit diagrams, PCB layouts, and hardware guides. 100,000+ downloads, 4.5 rating, 945 reviews.

Drivemond — Ride-Sharing SaaS Kit · Commercial SaaS

Complete ride-sharing and parcel delivery software — Flutter apps (user + driver), web admin panel, and business website. White-label solution used by 700+ businesses globally.

Novix VPN / Nshot VPN / IronGuard VPN · Play Store, App Store

Three VPN apps for three separate clients — built the Flutter/native front end and device-level connection UX, integrating with each client's own WireGuard, IKEv2, or OpenVPN backend.

AI Avatar BD · Play Store — AI companion app with text chat, voice/video calls, mood tracking, MBTI assessment.

Additional Play Store apps: NF Network (ISP billing & monitoring), SportAddict (live sports streaming), Earnstride (work-permit app for minors).

PERSONAL PROJECTS

Viewzy — phone-to-TV control app using UDP sockets and AccessibilityService for key/gesture injection (Flutter). **The Backpacker's Guide —** travel community app for journals and trip guides (Flutter + Firebase).

EDUCATION

Bachelor of Science (BSc) · American International University-Bangladesh · Sep 2019 – Jan 2021

HSC · Gazipur Metropolitan College · 2018 **SSC** · Rani Bilasmoni Govt. Boys' High School · 2016
